

CRIME STOPPERS INTERNATIONAL

OPERATION SILENT VECTOR I

“Unmask the dark”

The Ransomware Group Known as “INC Ransom”

REWARD	Up to US\$22,000 for information leading to arrest, prosecution or operational disruption of INC Ransom
KNOWN ALIASES	· Incransom · GOLD IONIC · INC Ransomware Group · INC Ransomware Operators · Tarnished Scorpion
STATUS	At large
ORIGIN	Russian-speaking
CLASSIFICATION	Public appeal – open-source intelligence

A public appeal from Crime Stoppers International for information leading to the **identification, arrest, or disruption** of the individuals behind INC ransomware operation. Anyone with information can report it — anonymously if desired. Details on participation in the Cybercrime Bounty program can be found here crimestoppersinternational.org/bounty

THE ASK

Crime Stoppers International is seeking actionable information that leads to the arrest, prosecution, or operational disruption of the operators and affiliates of INC Ransom. You do not need to know who they are. Technical evidence, financial trails, infrastructure details, and insider knowledge are all valuable. Every report is treated as confidential.

// 01 WHO ARE THE TARGETS?

INC Ransom (also Incransom) is a ransomware-as-a-service (RaaS) group that emerged in mid-2023, also known as GOLD IONIC. The group operates professionally with affiliates, primarily targeting high value targets North America, Europe and Latin America across healthcare¹, manufacturing, government, and education sectors. Since 2025 INC have expanded targets to Australia, New Zealand and Pacific Islands nations.

To gain access to victims, INC use spear phishing techniques, exploit known vulnerabilities² in internet-facing systems or leverage compromised victim credentials. The comprised victim is then subject to double extortion techniques—exfiltrating data before encryption and threatening leaks. INC Ransom extort victim organizations and handle ransom payments.³

WHY THEY MATTER

INC Ransom show no restraint against hospitals, healthcare providers, or critical services. Their victims include organizations whose disruption puts real people at risk. This is not a victimless financial crime.

¹Examples of healthcare attacks: <https://www.bleepingcomputer.com/news/security/mclaren-health-care-says-data-breach-impacts-743-000-patients/> and <https://www.bleepingcomputer.com/news/security/inc-ransom-threatens-to-leak-3tb-of-nhs-scotland-stolen-data/>

// 02 WHAT CAN YOU PROVIDE?

You may hold valuable information without realizing it. We are interested in anything that helps identify the people behind the operation or disrupt how it runs. For example:

A Identity & attribution

- The real-world identity, location, or movements of INC members or associates.
- Screennames, forum accounts, or contacts linked to the operation on underground forums such as RAMP or BreachForums.

B Money trail

- Cryptocurrency wallet addresses used to collect ransoms, launder funds, or pay affiliates.
- Cash-out points, exchanges, or intermediaries moving the crime proceeds.

C Infrastructure & operations

- Servers, domains, or hosting providers used for the leak site, control servers, or negotiation channels.
- Details of the affiliate program, recruitment, or internal structure.

D Insider knowledge

- Information from anyone who has worked with, been recruited by, or communicated with the group.
- Evidence of who directs the operation and the command structure.

A NOTE FOR INSIDERS

If you have been involved with this operation and want to come forward, information provided through Crime Stoppers is **anonymous**. You are not required to give your name. Early cooperation can matter.

// 03 AT A GLANCE

GROUP NAME	INC Ransom (Ransomware-as-a-Service and operational affiliates)
KNOWN ALIASES	· Incransom · GOLD IONIC · INC Ransomware Group · INC Ransomware Operators · Tarnished Scorpion
ACTIVE SINCE	Mid-2023

- AnyDesk
- Esentutl
- MegaSync
- Meterpreter
- NETSCAN.EXE
- Net
- Nltest
- PsExec
- PuTTY
- Rclone
- Tor
- WinRAR
- WMIC

Known Infection Vectors

- Exploiting public-facing applications (CVE-2023-3519 Citrix Bleed)
- Phishing for initial access
- Using compromised valid accounts (RDP/VPN)
- Partnerships with initial access brokers (GootLoader)

// 05 HOW TO REPORT

• ANONYMOUS • PROTECTED • REWARDABLE

Report anonymously through Crime Stoppers

International. Your identity is protected. You will never be asked to reveal who you are, and you may be eligible for a reward.

X Do not investigate on your own unless you are qualified to do so, or make contact with the group. These are dangerous, organized criminals. Your safety comes first.

X Do not attempt to access their systems or infrastructure. Report what you know; leave action to the authorities.

i If you are an active victim of a live attack, contact your national cybercrime authority or law enforcement immediately, in addition to any report you make here.
